

A Message for

Melinda French Gates

Closing gender gaps for good: A Gates Cambridge 20th Anniversary event

<https://www.gatescambridge.org>

By Nick Ray Ball 18th May 2021

1. You OK?
2. What could you accomplish with trillions, not billions?

Dear Melinda, as requested, if a new economics, a more creative capitalism, were to produce \$+/-1,066 Trillion US (Discounted to today's value) before 2080 and 75% can be dedicated cash flow to philanthropic, ecological and social projects where would you focus your spending?

Hi Melinda,

From your book 'The Moment of Lift, and Bill's How to Avoid a Climate Disaster, Abhijit and Esther's Poor Economics, Acemoglu and Robinsons Why Nations Fail, Raworth's Doughnut Economics, all works by Paul Collier and Creating a Learning Society by Joseph Stiglitz, **one common solution is found. Most problems would be solvable if we had more money.** For example, cement costs 300% more to make without carbon. But if you could increase the money supply by more than 300% you could afford it.

So, instead of looking for more donors or the next technology change to solve problems, what if, in place, we could make financial engineering software to increase the money supply.

Welcome to Supereconomics Book 2. And the Š-ŘÉŠ Story. **In this story, we hit 500% in a handful of years up to 3000% in between 25 and 40 years.**

See: [https://www.supereconomics.ai/11.11_SuEc.2_S-RES-BASIC--2024-to-2080_S-World-UCS-History-3_\(23-Jul-2020\).pdf](https://www.supereconomics.ai/11.11_SuEc.2_S-RES-BASIC--2024-to-2080_S-World-UCS-History-3_(23-Jul-2020).pdf)

And for what can be considered the S-World 2011 to 2021 PDFs Library containing 53 books and essays go to www.S-World.org (1,135,295 words - 5,484 pages.)

By increasing the money supply I mean solutions like quantitative easing or my favourite FRL (Fractional Reserve Lending). If a bank gets a \$1 billion deposit, it creates up to \$9 billion in loans, increasing the money supply by 900%.

In this story, we hear Technology 7 of 10. Š-ŘÉŠ (see www.Supereconomics.ai) can boost an economy by 3000% and it's completely safe. Unlike Fractional Reserve Lending where the bank only has 10% of its balance on hand, which can cause a bank run. Š-ŘÉŠ always has all the money in the bank, mostly in US Treasuries. But instead of spending that in one year, it applies Spin (Špin), spending it faster and faster. 32 times a year with an É of 99% gives you the 3000% I mentioned, and this would be between 2035 and 2055.

Please now look at the basic version of Supereconomics Book 3 – 64 Reasons Why

Inside the complete book, there is a lot of work on what we call Technology 8 S-World Net-Zero DCA Soft. (Dynamic Comparative Advantage Software) that, by some craft, creates Tax Symmetry, and the pay-out for philanthropy is that 75% of all cash flow spent by the new economy, is on one or another of the now 74 Special Projects seen in Book 3. 64 Reasons Why. This book was written with Kate Raworth and yourself in mind.

And so, to Women, well, I've only presented to women so far, that was deliberate, it's a shame no one replied. But then the theory was not so easily presented back then.

But the big one is we are building Cities from nothing, and we need to recruit personnel, make networks. And after some thought, I thought its most effective and cost-effective way to create the base of the network was to create a soccer league across our prototype country Malawi. There are many reasons, see; [https://www.angeltheory.org/07.83_SuEc.1-2_S-World-BES_Behavioural-Economic-Systems_Soccer-Leagues_S-World.biz_\(20-Jul-2018\).pdf](https://www.angeltheory.org/07.83_SuEc.1-2_S-World-BES_Behavioural-Economic-Systems_Soccer-Leagues_S-World.biz_(20-Jul-2018).pdf), but here's the punch, or the kicker, we simply pay the girls and women more than the men, so now, the economic incentive is no longer to have and give most food to boys.

I started this idea with the news from the books Poor Economics and Why Nations Fail that 100 million women and girls are missing from the world. Either aborted, malnourished, or in some cases murdered. At this point (about 3 years ago) I decided to create solutions for this genocide within my burgeoning S-World (Sienna's World) theory.

This solves part of the problem, the economic portion at any rate, and can be applied across the entire network, of thousands and in later years hundreds of thousands of businesses created in the Malawi Network.

Note there is no trade so globally it's a non-zero-sum game, the only financial input is the Suburb Sale \triangle . 99% of the new GDP created is consumed in Malawi by its people, so there is no reason the same plan cannot work in tens or even a hundred locations.

The mission in Malawi was to get from Zero to One percent of GDP, in History 2 that's about 2051 and in History 3 it's 2080. Making over \$10 trillion from 2024 to 2080. And remember 75% of that \$10 trillion is spent on special projects. which you and your teams are more than welcome to add to, or even manage if you so desired. A simple step would be to declare interest in being a trustee of the foundational wing of S-World, indeed consider this an invitation.

In about 4 weeks I will have the new book Supereconomics Book 2. **Š-
RÉS**2021—△≥É L

This book is incredibly powerful because I have organized the last 11 years work into 50 something books and essays and organized the best of the 40 something videos. And with this backdrop, I can, at last, make an adequate book summary, no heavy reading necessary as one gazes into what may be half of the world's economy come 2080.

The main thing I'm looking for is a recipient to send this new book to, in addition, I have a printed version of Supereconomics Book 3 – 64 Reasons Why Summary that I can send to you and the team either at Gates Cambridge or Gates Foundation. Just give me a recipient name and address and I can get it to you in 2 or 3 days.

Best Regards,

Nick Ray Ball
